

YOUR GUIDE TO HOME SECURITY

Which level of security is right for you?

At Comtronics, we know that your home is as unique as you are. We are here to help you create a home where you and your family can enjoy A Smarter Peace of Mind. Together, we personalize your system to meet your exact needs. Expert installation ensures that your system is set up to the highest standard. With 24/7 professional monitoring, you can trust that your home is protected. This is what we've been doing since 1958, so we're confident when we say that we can help you protect what you love.

1

LEVEL ONE

SECURE YOUR HOME

With Level One Security, your primary concern is protecting your home and family from intruders.

- Door / Window Sensors
- Motion Detectors
- Siren

Your Level One Security System will detect an intruder forcing a door or window open or when they violate an area of your home that is protected by a motion detector. Our monitoring center is notified immediately and is prepared to respond within seconds. Your siren will sound to deter the intruder.

2 LEVEL TWO

With Level Two Security, your primary concern is protecting your home, family, and valuables from intruders.

- Door / Window Sensors
- Motion Detectors
- Siren
- Glassbreak Detectors
- MotionViewer

SAFE AND SOUND AT HOME

Your Level Two Security System will detect an intruder forcing a door or window open before they gain entry into your home. Your motion detectors act as a second level of detection within your home. With the addition of glassbreak detectors, your home experiences an added layer of security. If a potential intruder breaks a window, your glassbreak detector will also trigger the alarm. MotionViewers act as a traditional motion detector by alerting you and our monitoring center of an intruder. However, the MotionViewer also captures still images or a quick video of what triggered it. Lastly, sensors can be placed on safes or interior doors that contain valuables. You will immediately be notified through a mobile notification if one of these sensors is triggered – allowing you to know if an intruder has accessed your valuables.

3 LEVEL THREE

With Level Three Security, your primary concern is protecting your home, family, and valuables from intruders and keeping your family safe.

- Door / Window Sensors
- Motion Detectors
- Siren
- Glassbreak Detectors
- MotionViewer
- Smoke Detectors
- Carbon Monoxide Detectors

PEACE OF MIND

Your Level Three Security System will detect an intruder before they ever gain entry into your home. Everything in Level Two Security is included in Level Three Security with the addition of Life Safety devices. Our Smoke and Carbon Monoxide Detectors call for help as soon as a threat is detected- whether you are home, asleep, or away. An audible alert announces the threat, so children and other family members know what to do. With one-go-all-go technology, every siren in your home will sound upon detection of smoke or carbon monoxide.
